

When you're aiming for best-in-breed...

TRUST CRYOPORT

Cryoport Systems offers best-in-class supply chain solutions, innovative technology, and expert customer support around the world to animal health organizations and breeders.

We transport high-value, irreplaceable materials to over 150 countries in a secure manner and prioritize risk mitigation with near real-time traceability for every shipment. Our robust fleet of temperature-controlled shippers, extended hold time capabilities, Condition Monitoring System, and Logistics Management Platform assure the security and integrity of veterinary pharmaceuticals, biologics, and all types of genetic material. Cryoport Systems' equipment is rigorously tested to endure the risks associated with an unpredictable shipping environment. Additionally, our extensive inventory enables us to supplement fleets at times of high demand.

When your shipments require the highest-quality temperature-controlled transport, you can rely on Cryoport Systems to get them to their destination.

WHY CHOOSE CRYOPORT SYSTEMS

INTELLIGENT LOGISTICS

Our condition monitoring system tracks key aspects of each shipment that could affect the quality or timing of delivery. Continuous monitoring tracks location (GPS), temperature, pressure, light, orientation, humidity, and shock.

END-TO-END SOLUTIONS

From point of origin to destination, we provide easy storage, ordering, fulfillment, shipping, continuous monitoring, documentation assistance, and dedicated customer assistance.

CHAIN OF COMPLIANCE®

Chain of Compliance® provides full traceability not only for commodity history of shipments, but for the historical use, performance, handling, requalification, cleaning, and disinfection of the equipment as well.

VERI-CLEAN® VALIDATED CLEANING PROCESS

The proprietary cleaning process for our shippers and stainless-steel accessories utilizes a multi-purpose reagent effective against bacteria and viruses. Veri-Clean® reduces external contaminants by 99.9999%

ABOUT CRYOPORT

Cryoport Systems is the premier provider of temperature-controlled supply chain solutions for the life sciences industry. We proudly offer the most comprehensive and flexible solutions to support research, clinical trials, and commercial therapies for biopharmaceutical, reproductive medicine, and animal health organization around the world. Our Integrated Supply Chain Platform brings complete integration and transparency to every step of the journey - delivering certainty to the life sciences.

When your livelihood relies on the health of your herd,
