

CRYOSHUTTLE™ SERVICE

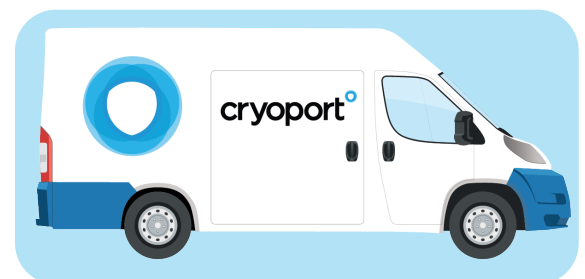

Through the launch of our Cryoshuttle™ local pickup and delivery service, Cryoport provides even more security and certainty for your valuable commodities. Our Cryoshuttle™ solution extends our market leading Chain of Compliance™ processes even deeper within your supply chain with seamless direct handling, traceability and visibility of your materials during local transport to and from manufacturing sites, hospitals, and clinics from your nearest Cryoport facility thus reducing risk.

The Cryoshuttle™ solution mitigates risk with significant reduction in shock and orientation events through utilization of specially trained drivers and logistics management. Additionally, our solution supports enhanced traceability to ensure stringent regulatory compliance standards are met. With improved handling, security and traceability, you can have certainty knowing that your materials will arrive at the destination on schedule and with documented sample integrity.

CRYOSHUTTLE™ KEY FEATURES:

- Local delivery & pickup service within proximal distance of all Cryoport Global Logistics Centers
- Accommodates pickup & delivery schedules outside standard business hours and days, including holidays
- Ability to support regularly scheduled pickups and deliveries in accordance with client schedules
- Cryoshuttle™ drivers are highly-qualified, uniformed Cryoport employees who are specifically trained to handle specialized equipment according to client processes
- Custom-built vehicles are GPS-tracked with video surveillance
- State-of-the-art routing software is utilized for most optimal and efficient routes
- Just-in-time deliveries and rush order capabilities
- 24/7 availability with proper notification
