

CRYOSHUTTLE®

World Class IVF Shipping Services

Through our Cryoshuttle® local pickup and delivery service, we have further extended our industry-leading Chain of Compliance® standardized processes to ensure the safety of your patients' reproductive materials. Transportation within the Boston, Metro New York City / New Jersey area, Washington, DC, N. Virginia Maryland area, Houston metropolitan, and Southern California area enables an expedited delivery of your patients' materials to eligible clinics, laboratories, and hospitals at a cost-effective rate. This service allows us to provide seamless direct handling, continuous traceability, and sample integrity documentation for your patients' embryos, eggs, and sperm.

CRYOSHUTTLE® KEY FEATURES:

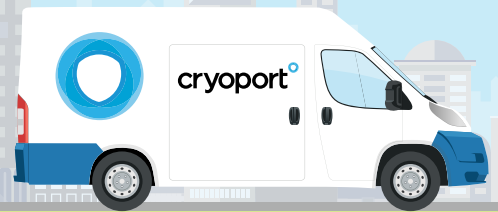

- Highly qualified Cryoport Systems drivers are trained to handle specialized equipment according to client processes and standard industry requirements.
- Advanced vehicle routing software is utilized for the most optimal and efficient transit path.
- Our custom-built vehicles include enhanced features such as near real-time GPS fleet tracking and interior and exterior video surveillance.
- We can support regularly scheduled pickups and deliveries as well as rush orders for additional convenience.
- Cryoport Systems' end-to-end solutions reduce risk, shock, and orientation upsets by utilizing video surveillance of the commodities from point of origin to delivery.
