

YOUR COMPREHENSIVE LIFE SCIENCE SUPPLY CHAIN PARTNER

Enabling the Outcome™ for Advanced Therapies

Cryoport Systems is a comprehensive supply chain partner for the life sciences industry focused on meeting the challenges of the biologics and global cell and gene therapy markets. We excel in the specialized management of the biopharmaceutical supply chain through our comprehensive offerings in logistics, BioServices, cryopreservation, and consulting. With our expansive platform of management solutions and decades of temperature-controlled supply chain expertise, Cryoport Systems helps **Enable the Outcome™** for advanced therapy programs by supporting certainty in the supply chain—one patient, one therapy, one product at a time.

COMPREHENSIVE BIOPHARMA SUPPLY CHAIN MANAGEMENT

THE CRYOPORT SYSTEMS ADVANTAGE

Dedicated Advanced Therapy Expertise. Strategic, Long-term Partnership. Validated and Verified.

Cryoport Systems, unmatched in our temperature-controlled supply chain expertise, has integrated cryopreservation into our platform of services for cell and gene therapy developers that require the collection, cryopreservation, distribution, and storage of advanced therapies. Our standardized cryopreservation protocols and use of innovative technologies support the biopharmaceutical supply chain from research stages to clinical operations and process development to manufacturing. Integrated into a platform of temperature-controlled logistics excellence, storage and distribution capabilities, and industry-leading cryopreservation services, IntegriCell™ helps to ensure the safety, quality, and viability of critical biotherapeutic materials.

Industry-leading Logistics

Diverse Logistics Solutions

Our expansive range of logistics capabilities includes managing materials and providing shipping solutions at cryogenic, ultra-cold (dry ice), and 2-8°C as well as controlled room temperatures.

Cryoshuttle® Local Pickup and Delivery

Cryoport Systems provides the local pickup and delivery of sensitive materials in our Cryoshuttle® by uniformed drivers trained to protect your valuable commodities. Available for rush orders, after-hours, and during holidays.

Lab Move Support

We offer complete laboratory relocation services and large-scale shipping that protects the integrity of your materials when moving both domestically and internationally.

24/7/365 Tracking & Order Management

Never lose sight of your materials with our online Cryoport® 2 Logistics Management System, validated to demonstrate compliance with 21 CFR Part 11 and ISPE GAMP. Our proprietary system features continuous tracking, in-packing monitoring, and expert client care.

Customized Consulting — Maximize Safety and Quality

We support research, clinical, and commercial programs with advanced risk mitigation services in:

- Apheresis Strategy & Sourcing
- Cryo-process Optimization
- Customized Packaging Design
- Packaging Validation
- Shipping Risk Assessment
- Shipping Lane Validation

Integrated BioServices

GMP Storage

Get secure, GMP-compliant storage at all temperatures through our fully validated storage units with continuous monitoring, redundant backup units, and compliant inventory management.

Drug Packaging & Labeling

We provide secondary packaging and compliant labeling of drug products and other materials while collaborating on effective solutions for your unique needs.

Kit Production

Our services create standardized and customized kit designs with clinical and non-clinical supplies at all temperatures, including the production and distribution of kit types for apheresis, blood/tissue collection, manufacturing, and drug administration.

Drug Recall, Return, & Destruction

Cryoport Systems offers the return, storage, and ultimate disposal of clinical trial materials carried out by an approved third party, which includes certificates of destruction.

Regulatory Services

Our EU locations provide Qualified Person (QP) oversight of import and release (as required by EU Clinical Trials Directive 2001/20/EC) with experts who can navigate complex regulatory environment of European clinical trial applications.

Clinical Sample Management

Our team offers the secure storage and traceability of your collected samples in addition to pre-analytical and analytical operations like blood separation, DNA extraction, PBMC preparation, and genetic analysis.

*Cryoport Systems has partnered with NMDP BioTherapies to expand our capabilities to include allogeneic donor sourcing, collection, and management. NMDP BioTherapies brings over 35 years of experience in donor identification and collection with access to nearly 7 million genetically diverse potential US donors.
